Dear Dr. Levine,

This is to say thank you for your collaboration with Randox Laboratory LTD in providing a donation of reagents for the needs of the hospital clinical laboratory. We highly appreciate your efforts, and hope this will be a good start for future shipments.

The University Hospital with a thousand beds is also a consulting hospital for four administrative regions (Plevna, Lovetch, Gabrovo and Veliko Turnovo), with a population close to one of about a million. The donation will make it easier to meet the health needs of the patients referred for treatment at the hospital.

In the past, the Plevna Clinical Laboratory participated in Randox International Quality Assessment Scheme (1993-1994, Lab. Ref. No 1527), and we are aware if the high quality of the reagents Randox produces, though the hospital cannot afford purchasing them due to financial difficulties in view of the health reforms we are going through in Bulgaria.

Specially appreciated are reagents for emergency and routine biochemistry tests – Triglycerides, HDL-cholesterol, Creatinine- kinase, Glucose tests CK-MB, UREA, ASAT, ALAT, GOD-PAP, and all the ones that the shipment contained.

Again, thank you for your concern and your help in times difficult for the hospital.

Sincerely yours,

Assoc. Prof. I. Lalev, MD, PhD

Director
